

Buxton Lime is the UK's market leader in the supply of sustainable lime solutions. Our innovative products allow us to continue to diversify our end-markets and act as a vital resource for global sustainability. We work with associated companies operating in Germany, the Czech Republic and Ireland to serve markets in Europe and the rest of the world.

The impact of climate change and the transition to a zero-carbon society are arguably the most important challenges for our generation. We are dedicated to limiting and mitigating the impact of our activities on climate change and are fully committed to achieving the UK Government's ambition of becoming net zero by 2050. This policy confirms our approach to reducing the carbon footprint of our operations and supporting our customers with innovative, sustainable products, services and solutions which contribute to a low carbon-built environment.

To support our approach, we will ensure that:

- We monitor, implement and enforce all relevant legislation and regulations, along with other relevant voluntary codes or best practices.
- We set objectives and targets, and we will act and review our performance to limit the emissions of greenhouse gases, in line with the objective of carbon neutrality by 2050.
- We secure line management responsibility for continually seeking new ways to reduce the carbon footprint of our business and products.
- We review energy opportunities and implement energy management plans and targets at all sites.
- We train employees in net zero carbon initiatives, appropriate to their role.
- We continue to implement opportunities which decrease our reliance on fossil fuels.
- We invest in low carbon technologies and ensure that net zero carbon is considered in our business decisions
- We engage with our supply chain to fully understand the scope 3 emissions associated with the products and services we buy
- We support customers to take advantage of our products' whole life benefits in mitigating and adapting to climate change
- We actively engage with policy makers, academia and industry to enable a low carbon future
- We provide products, services and solutions which contribute whole-life, low carbon benefits to the built environment
- We regularly review and report on our performance

This policy will be reviewed, as a minimum, annually

Peter Butterworth
Lime Director
